May 10, 2023

Greetings! This is Vivek Bakshi from EUV Litho, Inc. I'm excited to invite you to the 2023 EUVL Workshop and Supplier Showcase. After three years, we'll be holding our workshop in-person this year in imec from June 3rd through June 7th. And we have an excellent agenda. We have keynotes from Fraunhofer and ASML. We have over 55 presentations and as EUVL continues to move forward, the focus for this year is high-NA and the related technical challenges in the areas of mask, resist, patterning, and optics.

So, there'll be quite a few presentations there and I hope you'll be able to get a chance to have a look at the abstract that we have already published on our website (www.euvlitho.com). And we also have our final agenda there. This year, as we have done for the last several years, we have combined the EUVL infrastructure supplier showcase together with the workshop.

We will have over a dozen suppliers and institutions telling you about their products and services related to EUVL. I think you'll find those presentations very useful. In addition, we will have a poster session and a nice dinner in the historic areas in Leuven, and I'm really looking forward to it. Just to remind you, the abstract for poster papers are still accepted until this Friday and in the middle of next week, early registration ends.

So I hope you get to look at the abstract and final agenda—and don't forget the short courses on June 3rd and 4th. I hope to see you in Leuven. Take care.
